About

I have 3 years of experience in frontend development. Self-improved, every time improve my knowledge about used technologies and frameworks. I always try to pay attention to the details and nuances of the project and to find a good solution to the problem.

Work Experience

11.2022 – Present

Middle frontend developer Hivex

Developed features using Next.js, TanStackQuery, TS for the IT course platform (CMS)

03.2022 – 11.2022

Middle frontend developer Hivex

It was betting project. Worked on some features using React and wrote tests for them. Moreover, I restored the old feature and its functionality using Vue.js and Vuex. (These were lotteries for users). Studied the architecture of microfrontends.

06.2021 – 03.2022

Fullstack developer NIX

User can donate ETH Cryptocurrency and get NFT. I used Solidity for smart-contracts on Backend and React with Web3.js on Frontend

08.2020 – 06.2021

Fullstack developer NIX

Developing a Quizzes application in which in real-time an admin hosts questions in the room and the players can answer and get points. I was there as a full-stack developer and worked closely with many technologies on the frontend it was React, Typescript, Redux(Toolkit), WebSockets, TailwindCSS. Backend – NestJS, SocketIO, TypeORM, MySQL

Education History

Kharkiv National University of Radio Electronics

Bachelor degree at Computer Engineering

English level – B2
